

Chapter 4: Sensory Walk

Age 3-6 | Beginner | Parent/Teacher Guided

The reference encourages children to explore textures and notice what they see, feel and hear. This page makes that exploration intentional by giving the child one simple classification task at each stop.

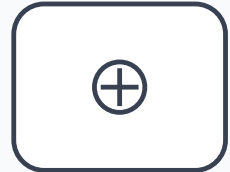

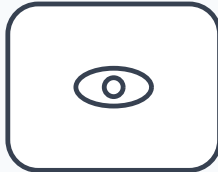

What to do

During a short walk, stop at one safe item. Ask, "Did you see it, hear it, or feel it?"

1. See

Child: point to or circle the same choice.

2. Hear

Child: point to or circle the same choice.

3. Feel

Child: point to or circle the same choice.

Keep the walk calm and predictable. Never require touching unfamiliar materials. The child may look, listen, point, or move on.
