

Chapter 5: Shape Sorting

Age 3-6 | Beginner | Parent/Teacher Guided

The reference includes sensory shape sorting with everyday objects. This worksheet adds a clear visual discrimination step so the child connects real sorting with basic shape concepts.

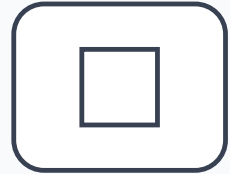

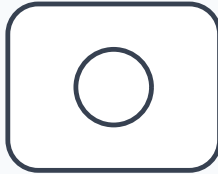

What to do

Place a few safe objects on a tray. Show one shape. Let the child find or sort the

1. Circle

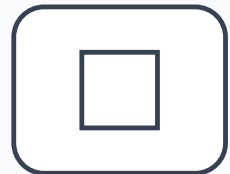

Child: point to or circle the same choice.

2. Triangle

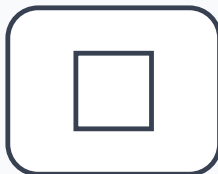

Child: point to or circle the same choice.

3. Square

Child: point to or circle the same choice.

Start with two shapes if three are too difficult. Change the objects while keeping the target shape the same to help the skill generalize.
