

Chapter 1: First • Next • Last

Age 3–6 | Beginner–Early Developing | Parent/Teacher Guided

The reference activities involve multi-step play: preparing materials, doing the activity, and cleaning up. This worksheet turns that idea into an early sequencing skill using simple visual choices.

What to do

Do the activity together. Show the three steps you actually followed. Ask the child to

1.

Child: point, choose, or circle the answer.

☐☐☐

2.

Child: point, choose, or circle the answer.

☐☐☐

3.

Child: point, choose, or circle the answer.

☐☐☐

Use the same routine repeatedly at first. The goal is understanding sequence, not reading the words; the adult can say the words while the child points.
