

## Chapter 2: Choose the Right Tool

Age 3–6 | Beginner–Early Developing | Parent/Teacher Guided

The pouring activity in the reference uses different tools and containers. This worksheet supports functional choice-making: identifying which tool fits the action the child is about to do.

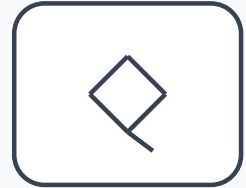

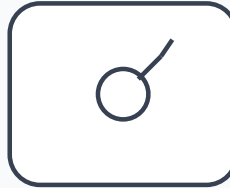

### What to do

Show the real tools first. Ask, "What do we use to pour?" or "What do we use to pour?"

1.

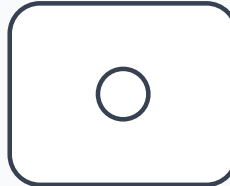

Child: point, choose, or circle the answer.

2.

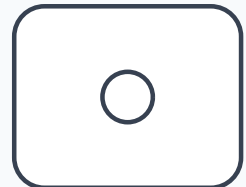

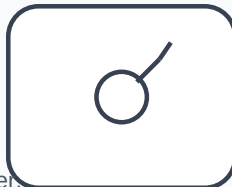

Child: point, choose, or circle the answer.

3.

Child: point, choose, or circle the answer.

Keep two choices if three are difficult. Follow a correct choice immediately with the real action so the child connects the picture with the activity.
