

Chapter 3: Copy the Movement

Age 3–6 | Beginner–Early Developing | Parent/Teacher Guided

The reference includes ball-pit play, walking, running and kite movement. This worksheet supports simple motor imitation: watch a movement, try it if comfortable, then identify what happened.

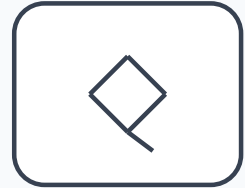

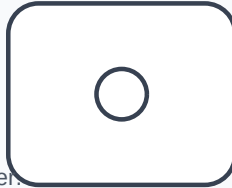

What to do

Model one safe movement. Give time to watch. Invite, not force, the child to copy. Then

1.

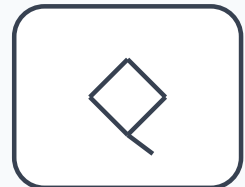

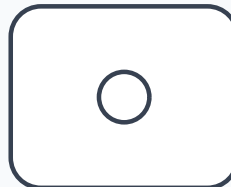

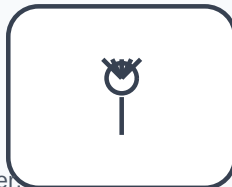

Child: point, choose, or circle the answer.

2.

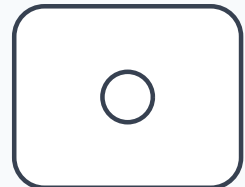

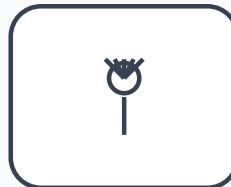

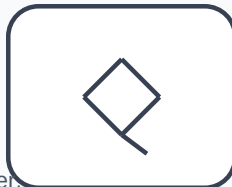

Child: point, choose, or circle the answer.

3.

Child: point, choose, or circle the answer.

Choose safe movements the child enjoys. Imitation is an invitation, not a compliance test. Reinforce looking, attempting, and communicating too.
