

Module 3: Sensory Skills & Communication

Age 3–6 | Beginner–Early Developing

Module 3 builds from the sensory-play activities in the supplied reference into more purposeful learning tasks. The emphasis is on sequence, functional choice-making, motor imitation, comparison, attention to the environment, and communication during pretend play. Each worksheet is designed to be used with the real activity first; the child can respond by looking, pointing, choosing, or circling.

Chapter 1: First • Next • Last

Early sequencing using the steps of sensory play.

[Worksheet PDF: Chapter_1_First_Next_Last.pdf](#)

Chapter 2: Choose the Right Tool

Functional choice-making with pouring, scooping and painting.

[Worksheet PDF: Chapter_2_Choose_the_Tool.pdf](#)

Chapter 3: Copy the Movement

Motor imitation using ball, walking and kite play.

[Worksheet PDF: Chapter_3_Copy_the_Movement.pdf](#)

Chapter 4: Same • Different

Compare two sensory experiences and communicate the difference.

[Worksheet PDF: Chapter_4_Same_or_Different.pdf](#)

Chapter 5: Look & Find

Purposeful attention during outdoor and sensory exploration.

[Worksheet PDF: Chapter_5_Look_and_Find.pdf](#)

Chapter 6: Build & Pretend

Choice-making and communication during construction pretend play.

How to use Module 3

1. Do the hands-on activity first; use the worksheet to reinforce the experience.
2. Give processing time and accept non-speaking responses such as pointing or choosing.
3. Start with two choices if three choices are difficult, then increase gradually.
4. Track independence: independent / prompted / physical help / no response.
5. Follow the child's lead and adapt or stop when an activity causes distress.
